Treatment furniture & Care Units equipment

Villard
M E D I C A L

Designer & Manufacturer of hospital furniture since 1947

Expert in mobile and modular furniture, Villard is one of France's leading companies in the design, manufacture and distribution of medical equipment and furniture for healthcare institutions. Based in its new 7,000m² factory in Neuville/Sarthe (Le Mans) since 2017, Villard promotes reliable and sustainable "French manufacturing", without intermediaries.

For over 70 years, Villard has continued to develop and adapt in order to reflect the evolution in hospitals, clinics and retirement homes as closely as possible, as well as to improve the working conditions of caregivers and adopt any new requirements in the field of prevention and hygiene in the healthcare setting. With its integrated design office and experienced technical teams, Villard designs and manufactures scalable furniture with a modular layout and certified quality, as recognized by more than 10,000 healthcare institutions worldwide.

Quality controlled & certified

In 2012, Villard implemented its Quality Management System for all of the company's departments (design, production and marketing), endorsed by ISO 9001-2015 Certification.

FABRIQUÉ EN FRANCE

All our products are produced near Le Mans in Sarthe. More than 80% of the components in our products come from French companies located within 300 km of our production site, the remaining 20% coming from other French or EEC companies.

Sustainable & responsible production

From eco-design to the collection and retroprocessing of our end-of-life products, Villard is a responsible producer that every day strives to reduce its ecological footprint.

French manufacturer, *committed by nature*

ISO 14001
certified company

ISO 9001 certified since 2012, **Villard is carrying on its continuous improvement strategy by obtaining ISO 14001 certification in 2021 for its environmental commitment.** More than just a certification, this global approach in place for several years now motivates us to reduce the environmental and societal impacts of our activities, products and services.

It is our everyday actions, our manufacturing processes and our search for innovative solutions that will contribute to a more profound change.

From eco-design to recycling our products, Villard is a committed and responsible manufacturer that strives to reduce its ecological footprint every day.

The eco-design of our products

The durability of our products is the 1st in ecology and savings: it is from the analysis of the life cycle that we develop modular equipment, designed from 100% recyclable materials, coming with priority from our French suppliers, that Villard guarantees the longevity of its products.

ball bearings

Made in **Yvelines (78)**

Eolis® modular cart
entirely designed and assembled by
Villard in **Sarthe (72)**

100%
recyclable

A hit eco-responsible packaging!

Villard gives particular attention to the packaging of its products in order to ensure, in optimum conditions, the various logistics operations (handling, transport and storage) and as such limit damages which is a source of waste and over-production.

Our packaging is custom-made with eco-designed cartons: FSC certified, made of 70% recycled materials, 100% recyclable and reusable; arranged on exclusively recycled wooden pallets.

Responsible purchasing

Villard selects its suppliers and service providers by integrating environmental and social criteria: we favour short circuits, optimise procurement and apply a life cycle and global cost logic in our purchasing processes.

A 2nd life guaranteed for our products

Member of the collective sectors VALDELIA (for F-waste) and ECOSYSTEM (for WEEE) approved by the Ministry of the Environment, Villard offers its customers the possibility of getting rid of their products at the end of life without discarding or polluting.

Sustainable logistics solutions

Villard develops partnerships with committed carriers who help us reduce the environmental impact of our supply chain: grouping organisation by courier, low carbon emission transport, multi-modal solutions, use of alternative-energy vehicles, etc.

Limiting and recycling our waste

Villard optimises its production process in order to limit scrap and waste: producing nested parts, choosing dimensions of raw materials, assembling machined parts that do not generate any additional waste, etc. All throughout the manufacturing cycle, our scrap and waste is sorted and retreated by local partners who are specialised and certified.

In application of Art. L.541-10-13 of the French Environmental code, unique identifier numbers were delivered by ADEME to Villard certifying that we fulfil our extended producer responsibility obligations and that we are compliant with the law.

Our unique identifier numbers (UIN) are:

- for the sector of WEEE: **FR000365_05HLRA**
WEEE: Waste Electrical and Electronic Equipment
- for the sector of F-waste: **FR000365_100M11**
F-waste: Furniture Waste

Latest-generation plant

In 2017, Villard invested in a 7,000 m² production tool that is energy-efficient and environmentally-friendly as required by 2012 Thermal Regulation. Today, we have a treatment plant for our wastewater in a closed circuit, which allows for a total absence of outside pollution and a significant drop in our consumption.

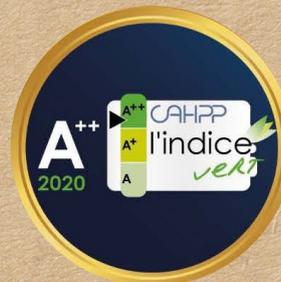

A recognised approach

EcoVadis Silver medal

In order to confirm its commitment on CSR (Corporate Social Responsibility) issues, Villard has had its CSR policy validated by the EcoVadis organisation, the top international independent platform for evaluating CSR performance.

With a total score of 64/100 in 2021, **Villard received a silver medal for its 1st evaluation. This results allows Villard to be in the top 4% of the companies in its sector** of activity evaluated by EcoVadis.

Winner of the Indice Vert (Green Index) A++

In the framework of its sustainable development approach, each year the central procurement office CAHPP evaluates, on a contractual basis and with proof, the sustainable development strategy of its suppliers with the "Indice Vert" label.

AFAQ Responsible Purchasing CSR Focus certified by AFNOR ("confirmed" level), **the central procurement office has given its best score to Villard (97.8/100) among the 315 suppliers evaluated for its degree of commitment and continuous improvement in terms of CSR and responsible production.**

Villard guarantees our products are 100% made in France, in our new 7,000 m² factory based in Neuville/Sarthe near Le Mans.

Certified ISO 9001 & 14001 company since 2012, Villard ensures quality control at each stage of its production and for all departments: Design, Production and Marketing.

All products manufactured in our factory are guaranteed for 10 years against any manufacturing defect (excluding electronic and wearing parts, guaranteed for 2 years).

In order to reduce our ecological footprint, more than 80% of the components in our products are provided by French companies located within 500 km of our factory.

**More than Made in France,
Choose Made in Villard.**

After-sales service is provided directly by our factory within a maximum period of 48 hours. (excluding weekends and public holidays).

Villard solutions have been selected and approved for over 20 years by the largest public and private purchasing groups.

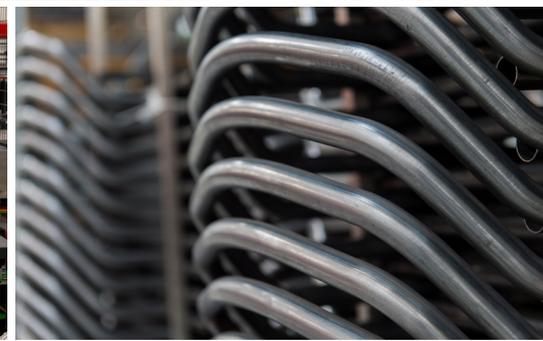

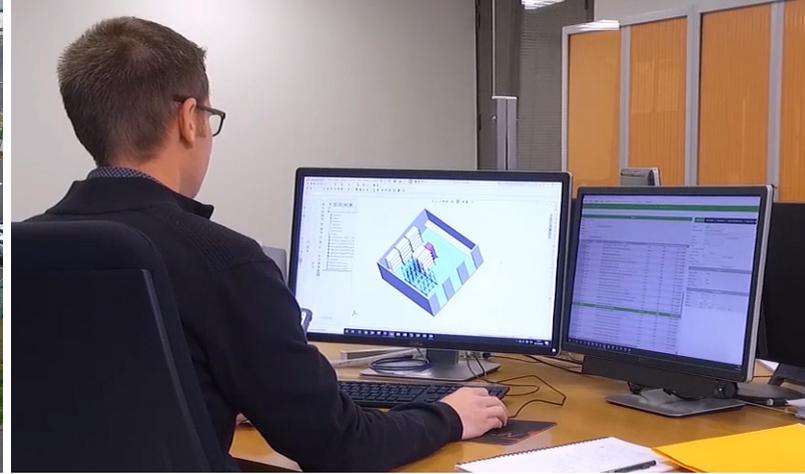

As part of our quality focus, Villard was awarded a rating of 9/10 by healthcare institutions for the quality of our customer support.

As part of its commitment to social responsibility, each year Villard participates in donating medical equipment to humanitarian and non-profitable organisations (MSF, Horizon Sahel, Pharmaciens Sans Frontières, etc.).

Villard has been taking care of caregivers for over 70 years. Its expertise has been recognised in more than 10,000 healthcare institutions in 65 countries around the world.

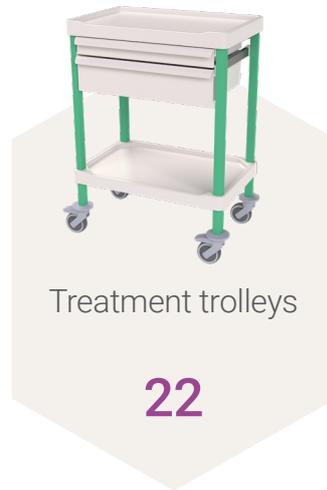

**FABRIQUÉ

Villard
M E D I C A L

Villard supports you

A human-sized project team, available and experienced, to provide you with support on a daily basis.

10 regional managers for "turn-key" management of your project (study of your logistics circuits, measurement taking, installation project, etc.).

3D plans made by our design office allow you to imagine your future customised layout.

A detailed and clear price offering to keep control of your budget.

The manufacturing and the delivery of your future equipment in the best timeframes, taking your logistics constraints into account.

Personalised support through to commissioning and training on our products for users.

eolis

A 100% Made in France

modular range

Robust

Entirely designed with stainless materials, the Eolis® range guarantees optimum service life with no risk of corrosion or alteration of the structure.

Modular

Provided with modular internal ladders, the Eolis® range makes it possible to "custom" outfit your equipment in order to meet all needs.

Sustainable

As a responsible manufacturer, the products in the Eolis® range are entirely designed from recycled and 100% recyclable materials.

10-year warranty

All the products in the Eolis® range are guaranteed 10 years against any manufacturing defect (excluding electronic parts and wear parts).

Easy to move

All Eolis® is equipped standard with Ø 125 mm wheels with stainless steel ball bearings. Double-roller wheels are available as an option.

Easy to clean

With their rounded design with no corners or asperities in order to facilitate cleaning, Eolis® carts are compatible the disinfectants recommended in the care environment.

Stainless steel trolleys

- Argon welded construction - Stainless steel tube leg Ø 25 mm.
- Neat finish perfectly adapted to the operating theatre - 18/10 stainless steel quality (AISI 304).
- Stainless steel trays with turned down or raised edges - Optional stainless steel drawers and galleries.
- Trolleys with or without push handle (formed by stainless steel arches -on each side).
- Swivel wheels Ø 100 mm.

Villard takes care of your patients and of your caregivers

What exactly is Villard's QHSE approach?

This approach is the fruit of our expertise in the management of "turnkey" outfitting projects within health establishments and of our know-how as a sustainable and responsible French designer and manufacturer.

Every day, we monitor the identification and compliance with standards and requirements in terms of **quality**, **hygiene** and **safety**, with special attention given to the working environment of the caregivers, the equipment and respect for the **environment**. In the field, this is applied by:

The risk analysis aimed at identifying and listing the various hazards associated with your environment.

A complete and free diagnosis of all the logistics circuits in your establishment.

Recommendations and advice that is adapted and compliant with quality and hygiene standards.

Personalised support through to commissioning and training on our products for users.

→ A few of our achievements:

Storage for the operating theatre and the sterile orthopaedic arsenal
of the Ambroise-Paré Hospital.

Refurbishment and reorganisation of the stocks
of the PUI (internal use pharmacy) of the Yves Le Foll Hospital Centre in St-Brieuc.

Equipment for ICU
for the new Hautepierre 2 Hospital (University Hospitals of Strasbourg).

Mobile and modular furniture in the treatment rooms
after the extension of the St-Riquier EHPAD.

Operating theatre of the new ophthalmology centre
of the AP-HP, OphtalmoPôle, installed at the heart of the Cochin Hospital.

Outfitting of storage zones
in the treatment rooms of the new establishment of the La Marteraye SSR (secondary treatment) Centre.

Equipment for the management of laundry in the units
for the extension of the St-Jean Hospital at Briare-le-Canal.

→ Objectives:

- Controlling the risk of infection
- Initiation in good practices
- Ensuring safety
- Making savings
